Re: **The Newswire**

Global Stocks News (GSN) provides communication and marketing services to small and medium cap companies.

We recently switched from a major publicly-traded distributor to *TheNewswire*.

This has radically improved our bottom line.

GSN now has the flexibility to distribute video and images (The Newswire does not apply surcharges for non-text content). With our previous provider, the costs were prohibitive.

We have experience with all providers; I get the same reach with *TheNewswire*, and the added bonus of friendly staff who are also journalists and problem solvers.

With its flat-rate billing, TNW keeps our distribution costs down, which keeps client's costs down, which makes GSN a more profitable company and a more powerful content provider.

Any questions, feel free to call me.
